SUMMARY

Final-year student and Full Stack Developer experienced in building **6+** scalable, secure web applications with **React.js**, **Next.js**, **Node.js**, **Express.js**, **JavaScript**, **TypeScript**, and REST APIs, including authentication, authorization, and database integration with **MySQL and MongoDB**. Proficient in **Salesforce** development (Apex, Lightning Web Components, SOQL/SOSL) and **AI-assisted development** using Claude Code and prompt engineering. Graduating in **Aug 2027**; open to **SDE-1, entry-level, and software engineering internship** roles.

SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, PHP, C++

Frontend: HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, Bootstrap

Backend & Databases: Node.js, Express.js, REST APIs, MySQL, MongoDB, PostgreSQL

Salesforce: Apex, Lightning Web Components (LWC), SOQL, SOSL, Apex Triggers, Lightning App Builder

AI/ML: Machine Learning, Data Analysis, Generative AI, Claude Code, ChatGPT, Prompt Engineering

Cloud & Tools: Google Cloud Platform (GCP), Amazon Web Services (AWS), DevOps, Git, GitHub, VS Code

EXPERIENCE

Salesforce Development Intern — Placement Management System ([GitHub](#))

Jun 2026 – Jul 2026

- Developed a Placement Management System using **LWC, Apex, and SOQL/SOSL**, building **8+ custom objects** to automate student registration and application tracking for **500+ records**, cutting manual effort by **70%**.
- Built **12+ reusable Lightning Web Components** integrated with Apex controllers for placement workflows.
- Automated business processes with **10+ Apex classes, triggers, validation rules, and record-triggered flows**, enforcing **100%** data integrity and cutting record-retrieval time by **40%** through **25+ optimized SOQL/SOSL queries**.

Jarvis — AI Desktop Voice Assistant ([GitHub](#))

Jan 2026 – May 2026

- Built an AI-powered desktop voice assistant using **Python, Flask, SpeechRecognition, and PyAutoGUI**, enabling hands-free automation of **50+ system commands** and reducing repetitive manual task time by **60%**.
- Implemented wake-word detection, speech recognition, and desktop automation modules with **90%+ command-recognition accuracy**, delivering seamless hands-free control across **20+ Windows applications** and system operations.

PROJECTS

Secure Vault — HTML, CSS, JavaScript, Web Crypto API, SHA-256, Git ([GitHub](#))

- Engineered a secure file storage and management application implementing **SHA-256 password hashing** and the **Web Crypto API**, encrypting **100%** of stored credentials client-side.
- Designed a cross-browser compatible user interface using **HTML, CSS, and JavaScript**, validated across **5+ browsers** and screen sizes.

Fresh Grocery Mart — React.js, Node.js, Express.js, MongoDB, REST APIs ([GitHub](#))

- Designed a full-stack grocery e-commerce platform on the **MERN stack** with secure user authentication, a **100+ item product catalog**, shopping cart, and order management served through **15+ REST API endpoints**.
- Implemented a responsive, mobile-friendly interface in **React.js** with **20+ reusable components**, improving page-load speed by **30%** for a consistent experience across devices.

EDUCATION

Gautam Buddha University, Greater Noida

B.Tech in Computer Science and Engineering (Data Science)

Aug 2023 – Aug 2027

Shri Sundar Lal Inter College, Barabanki

Class XII (Higher Secondary)

Apr 2022 – Apr 2023

ACHIEVEMENTS

- Smart India Hackathon (SIH) 2025: collaborated in a **6-member team** on a real-world problem statement. ([LinkedIn](#))
- Completed the Deloitte Data Analytics Job Simulation with hands-on data analysis and visualization. ([LinkedIn](#))
- Completed the Tata GenAI Data Analytics Job Simulation, applying AI-driven analytics techniques. ([LinkedIn](#))
- Earned the Google Cloud Computing Foundation & Generative AI certification. ([LinkedIn](#))
